

# ChatRTDIP

## Leveraging the power of large language models (LLM) and generative AI

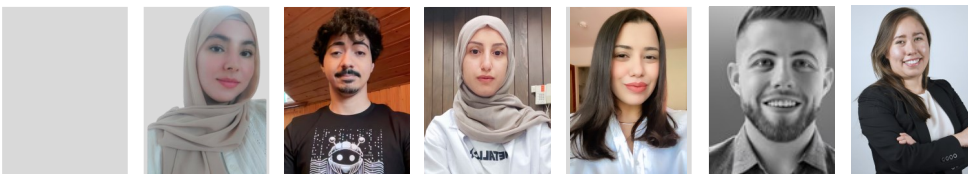

The project focuses on creating a platform where users can easily set up data pipelines using a chat-like interface.

The platform's user-friendly interface, enables users of diverse backgrounds, both technical and non-technical, to easily create complex RTDIP configurations.

Integration of the RTDIP and RTDIP SDK as a knowledge base, combined with a chat engine.

**Demo Day on 07.02.2024  
at 10:15 via ZOOM.**

This project is a collaborative effort between FAU, TU Berlin and an Industry Partner.

AMOS Team 5—Zain Hazzouri, Sara El Brak, Obeidah Smadi, Nahrain Gtari, Linda Najjar, Avi Katziuk, Cecilia Betancourt.
